We are thrilled to introduce **MVR460**, a groundbreaking 4Kp60 & HD medical video recorder and archiving system. Engineered with our powerful MVR Core™ technology, the MVR460 system is **AI-ready** , and designed to redefine how medical professionals connect with medical imaging systems and manage patient workflow in the OR. With over 20 years of innovation, MediCapture presents the MVR460, a top-tier 4K next-generation system designed for healthcare providers around the globe.

The **MVR460** is a premium, compact, and robust system for medical imaging and surgical needs. As part of **MediCapture's PRO Range.**

The MVR460 is a 4Kp60 and HD recording and archiving system that can be connected simultaneously to two processors via 12G-SDI, DisplayPort or HDMI. It can also add USB accessories, such as PTZ cameras or USB-powered endoscopes.

Exclusive Features of the MVR460:

- **MVR Core™ Technology**: Powered by MVR Core™, it delivers Dual-Input 4K recording, data management, security, and seamless archiving.
- **Upgrade Packages**: MVR460 is scalable. Our DICOM[1] upgrade package provides customers with seamless connectivity to HIS and patient worklists.
- **Universal Printing:** MVR460 can connect to standard printers on the hospitals network.
- **Sharing & Streaming:** Medical professionals can use the MVR460 streaming option to improve collaboration and communication.
- **Built-In Speakers:** MVR460 has integrated high-quality speakers.

The MVR460 will launch internationally on January 2, 2025. Pre-orders are currently open and will be processed on a first-come, first-served basis in January-February 2025.
